

ALMAMET: Proceeding 2008 (E)

23.-26. September 2008 in Lisbon/Portugal

Contents

1. Utilization of magnesium scrap in the desulphurisation sector
2. Optimization of the desulphurization process at ArcelorMittal Bremen
3. Treatment of converter lime – undersize for the pig iron desulphurization
4. Analysis of the Hot Metal Desulphurization Process
5. Successful Hot Metal Desulfurization at JSW Steel Limited, India
6. The pig iron desulphurization as an important procedural step of the steel production
7. The practice of different hot metal desulphurization processes at Wuhan Iron & Steel Corporation
8. Improved performance of NTMK's desulfurization plant
9. The utilisation of desulphurisation agents in the secondary metallurgy
10. Modernization and extension of pig iron desulphurization plants during running production
11. Concepts to supply the steel industry with desulfurization reagents
12. Effective Out-of-Furnace Calcium Carbide Assisted Steel Processing Technology at Cherepovets Metallurgical Plant (CherMP)
